TO YOUR LIFE

Fall

2004

Undergraduate enrollment on the first day of classes at the University of Missouri-Rolla is expected to be 4,052, an increase of 14 students over last year's record figure of 4,038, says Laura Stoll, UMR registrar.

UMR graduate Sandra Magnus and a crew of four other astronauts and one Russian cosmonaut are scheduled to lift off from the Kennedy Space Center in Florida Oct. 7 aboard the space shuttle Atlantis. This is Magnus' first space flight.

U.S. News and World Report has again ranked UMR as one of the nation's top engineering schools in the magazine's annual guidebook, "America's Best Colleges 2005." The magazine's online edition also ranks UMR No. 52 among the nation's top public universities.

The UMR office of publications recently received an award of excellence in the special event category from the University & College Designers Association (UCDA).

UMR recently received the 2004 Award of Merit from the Missouri Association for Career and Technical Education (ACTE) for the campus' collaboration with Rolla Technical Institute (RTI) on several research and educational projects.

The UMR and Rolla Technical Institute Solar House Team, which survived the 10 tests of the 2002 Solar Decathlon, is about to face the ultimate test — occupancy. Allison Arnn of De Soto, Mo., a senior in engineering management and the team's project manager, plans to move into the house Sept. 30 and live there indefinitely.

UMR was recently ranked 22 among 357 campuses for entrepreneurship in a survey conducted by Forbes magazine and the Princeton Review.

Two mine rescue teams from UMR finished in fourth and sixth places overall in the Southeast Missouri Mine Rescue Contest held Oct. 7-8 at the UMR Experimental Mine.

Twenty-one faculty members from the College of Arts and Sciences (CAS) at the University of Missouri-Rolla were honored for their excellence in teaching in 2003-2004 during a reception held Wednesday, Oct. 6.

Dr. Ronaldo Luna, associate professor of civil, architectural and environmental engineering at the University of Missouri-Rolla, has been awarded a Fulbright Scholar grant to lecture and conduct research for a semester at the Universidad del Valle in Guatemala City, Guatemala, starting in January 2005.

Spring

2005

News

University of Missouri-Rolla faculty, staff and students have joined Rolla community members to form the Rolla Community Tsunami Relief Fund to raise funds for assistance to victims of the earthquake and tsunami in southeast Asia. To date the groups have raised more than \$5,000.

Members of the Rolla Area Chamber of Commerce were present for a ribbon-cutting ceremony at UMR's Havener Center Feb. 23. Following the ribbon-cutting, chamber members ate lunch in the new student center and toured the facility.

The University of Missouri-Rolla will celebrate the 30th anniversary of its Women in Science and Engineering (WISE) program with festivities on Saturday, March 12.

A new study guide by a University of Missouri-Rolla associate professor may help engineering students earn their professional engineering license by reviewing the basics of industrial engineering, common mistakes, and sample problems found in the industrial engineering portion of the national Fundamentals of Engineering exam.

Dr. Michael Schulz, professor of physics at the University of Missouri-Rolla and director of the UMR Laboratory for Atomic, Molecular and Optical Research, has been named a fellow of the American Physical Society.

Public radio station KUMR finished its eight-day spring membership drive Saturday, March 12, surpassing its monetary goal of \$65,000 and adding more than 50 new members.

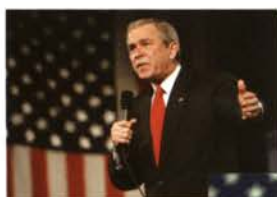

Members of the University of Missouri-Rolla Solar Car Team, defending world champions in solar car racing, will unveil their new vehicle, "Solar Miner V," at 2 p.m. March 19, in the atrium of the Havener Center on the UMR campus.

Dr. William Schonberg, chair and professor of civil, architectural and environmental engineering at the University of Missouri-Rolla, has been elected a fellow of the American Society of Mechanical Engineers (ASME) for his "significant engineering achievements and contributions to the engineering profession."

DECISION 2004

Students work to make a difference during the 2004 Presidential election.

CHOOSING SIDES

Left. THE ROAD TO VICTORY

The College Democrats were very active this semester. With a mailing list of over fifty people, weekly voter registration drives through September and October, open forums, and working directly with the local Democratic Headquarters, members did what they could to reach out to students and get them to vote.

The most notable event held by the College Democrats was the visit by Chris Heinz, the stepson of Democratic presidential nominee John Kerry. Heinz gave a speech at the puck, and about 250 people turned out to hear what he had to say - including his emphasis on the importance of student involvement.

"The best part about being involved in the election was to see the response we got from campus," Angela Agee, vice president of the College Democrats said. "I realize I started to

make the campus more aware. They got involved, they went and voted and were excited about it."

Agee, excited about voting herself, wore a "Vote or Die" t-shirt on the day of election and invited other students who voted to sign it.

"We had several brave souls at the Puck all day urging people to go vote and handing out information about Democratic candidates," Ryan Davidson, president of The College Democrats said. "I had the opportunity to meet a lot of really energetic people on campus who have ideals similar to mine that I never would have run into if I hadn't gotten involved here on campus."

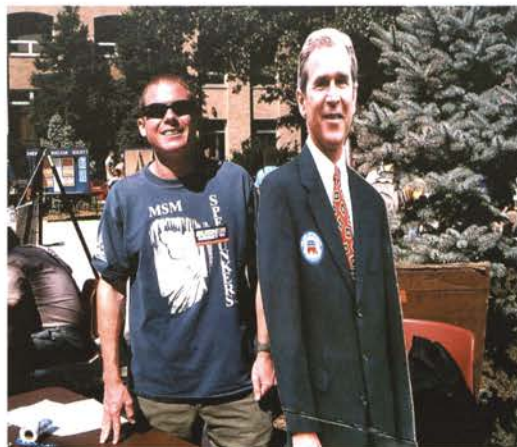

The College Democrats were fortunate enough to get Chris Heinz, John Kerry's stepson to speak at UMR. Photo by JR Slane, courtesy of The Miner.

Right.

Decked out with American flags, signs, and plenty of "W's," members of UMR's College Republicans, along with members of the Rolla community and students from Joplin and Springfield, loaded a bus bound for St. Louis on the night of October 8, 2004. That night marked the second of three presidential debates between President Bush and Senator John Kerry.

Upon arrival, the president of the National College Republicans greeted the students, made sure they had signs, and handed out perhaps the greatest prop of the night - gigantic flip flops for people to wear. The students were dropped off near the heart of the action, right next to the war protesters, where police officers wearing riot gear guarded nearby. Shouts of "four more years!" echoed through the streets until finally the time came - President Bush's motorcade drove past.

The students then retreated to Union Station for a quick bite to eat, and to

watch the debate from the restaurant. They clapped and cheered at nearly every answer the President gave, and after about an hour headed back to Washington University for their final, and possibly most exciting gathering of the evening.

They lined the streets near the Wash U, which were completely empty and blocked at every possible intersection. Still donning signs, they waited in hopes of one more chance to see the President. After about a 20-minute wait, that chance finally came. A line of police and fire vehicles rushed past, and in the middle, a smiling President Bush waved out the window to his excited crowd of supporters.

"I went to the rally because I wanted to show support for Bush and possibly give a few liberals some hell. I also figured it would be fun and way to meet new people. Finally, I wanted to see President Bush in person," Adam Flynn said. "It was everything I expected it to be, and I'd say the highlight was seeing President Bush drive by on his way to the debate."

"All in all we had a blast meeting and talking with other college students that had the same views as

us," Brandon Bundy said.

Photos from top: Conor Watkins poses with the President. Adam Flynn holds up a giant flip flop in support of the President at the second presidential debate in St. Louis. Brandon Bundy holds a Bush sign at the presidential debate. Photos by Kelley Hummingbird.

SEEING RED AGAIN

It was good news for some, devastation for others. Winning with 286 electoral votes and over 60.6 million popular votes (51%), President Bush kept his title and house and will lead the United States for four more years. Voter turnout rate approached 60%, the highest since 1968.

While things seem to be back to normal now, for a short time people were passionate about the debates and topics that

were on television, radios, and newspapers. Bumper stickers on cars stated positions, and signs posted in the yards of American citizens were everywhere - showing that at least in Rolla, people cared about the outcome of this election.

The voice of America was definitely heard this election year. In four years, it will be heard again.

Greek Week 2004

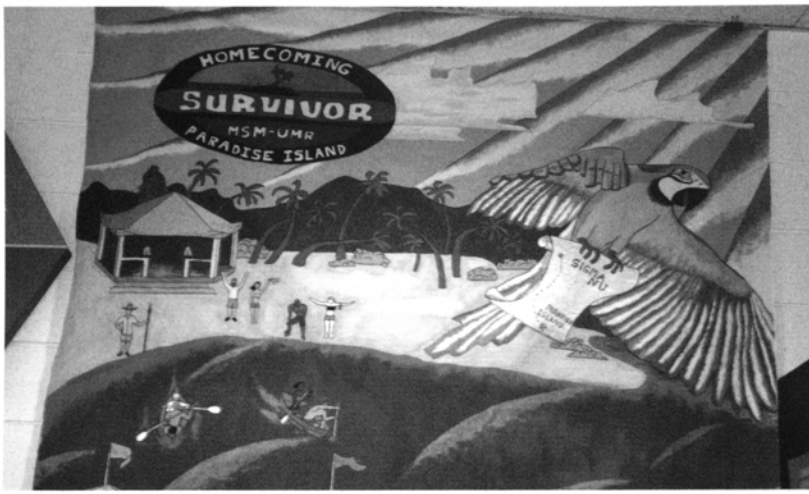

by: Stephanie Harman

Taking a quick glance around the beautiful campus of UMR the third week of September, onlookers could see Poseidon, Zeus, Aphrodite, Artemis, and Athena. Those people not familiar with the festivities taking place would be baffled; they would be left wondering why Greek Gods and Goddesses were inhabiting the earth. On the other hand, UMR students would recognize the annual festivities of Hayrides and Idi-Odysseys as the kickoff of Greek Week 2004!

Ruling the week and residing over the celebrations, the eleven seniors of Panhellenic Council and Interfraternity Council took the spotlight. From Hermes to Aurora, the Gods and Goddesses attended the Greek Week games and activities to support their various Fraternities and Sororities. Decked out in jerseys and hats (the entire week) that were inscribed with the gods/goddesses they were representing, the immortal students gave Greek Week their all! Predominantly, Daniel Miller of Zeta Tau Alpha was honored by her fellow Greek community as the Queen of Greek Week!

Not only were there gods and goddesses participating throughout the week, but the fraternities and sororities brought out there new members and actives to take part as well. Many activities took place: there were football, volleyball, and soccer games, as well as chariot races, obstacle courses, and dodgeball tournaments. Putting up a lot of competition and providing entertainment for various onlookers, the various Greek organizations fought many great battles. Ruling over these games, Kappa Delta took first place out of the sororities, and Kappa Sigma took the gold for the fraternities!

Playing their roles and supporting their houses, the Greek community made Greek Week the best it could be! They participated in opening games, closing games, hayrides, and various activities at the puck to show how great UMR Greeks truly are! With a queen, gods, and goddesses, the week showed how various organizations can get together and have a great time with some friendly competitive games, keeping the Greek community tied together!

Homecoming

Paradise Island or Trouble in Paradise ?

Story by: Traci Holcomb

The theme for homecoming 2004 was "Paradise Island". The actuality of homecoming was anything but paradise. Royalty competitions were tampered with and many believe to be unfair, yard decorations were set a blaze, and the football game left little to celebrate for the alumni.

We almost always think of homecoming royalty as the most popular and most beautiful people in your school. At UMR we have corrected that problem by having activities other than just voting. There are interviews, barbeques, and competitions. This year however, many candidates were not given information about events. The most troubling part of this whole situation is that when voting took place there was no method of keeping track of who voted and how many times. Eventually a two day voting period was aloud that took care of these events. In the end Patrick Wallain (Sigma Chi), a senior in civil engineering was chosen homecoming King and Danielle Miller (Zeta Tau Alpha), a senior in mechanical engineering was chosen homecoming queen.

Many of the activities that we have seen in the past were, unfortunately, canceled because of the bad weather. Some of these events included the Student/Alumni golf tournament and the M-Club bonfire. Another event that was canceled was the Jello wrestling, arguably a favorite by many of the students. However this cancellation came not from weather but SUB itself. Only they will know why.

Through all of the controversy disaster struck. On Saturday October 16 the Pi Kappa Alpha yard decoration was set on fire. The yard decoration, which has been a big part of the welcoming of alumni, was a giant wooden pirate ship just feet from the house itself. With this "prank" happening just a few years after the unfortunate accident in which their house burned down the Pikes were not laughing.

And then there was the football game, the event that homecoming would not be complete without, which didn't exactly go as planned either. After a hopeful beginning, in which the Miners held the Ichabods and then scored a field goal, everything went down hill. In the end the Miners lost in a humiliating defeat of 42-7.

Although this year wasn't all it was cracked up to be there is always next year.

Emerson Drive and Jolie Edwards

Story by Daniel Bush

Emerson Drive and their crew. Photo by Josh Hoffman.

The SUB fall concert featured Emerson Drive, a country band with Canadian origin. The opener was Jolie Edwards, a rising country music singer, who did a marvelous job and excited the crowd for the headliner. Fans waited for over two hours outside the multi-purpose building to see Emerson Drive. And they were not disappointed. The performance was something to be remembered, with amazing instrumentals as well as good vocals. The six members brought the crowd to a roar on every song they played. There were a few fans that were following the band on their college tour that came from New Jersey. All in all, it was a very good show, ending around 10:00pm with an autograph time following.

Perlman Performs at UMR

By: Charlie Ewell

Itzhak Perlman thrilled the crowd at Leach Theater on Monday, September 20th with an emotive violin presentation.

The free concert was the 27th event of the Remmers Special Artist/Lecturer Series, founded by Walter E. Remmers. Mr. Perlman preformed with pianist Rohan De Silva.

Itzhak Pearlman is undoubtedly one of today's best classical musicians. His achievements include earning 15 Grammy Awards, four Emmy Awards, and performing the violin solos in Steven Spielberg's Academy Award-winning film 'Schindler's List'.

Mr. Perlman began his UMR concert with pieces from Mozart and Beethoven. He helped compose his third piece with Zwilich, which he preformed as a UMR premiere.

As Perlman introduced his fourth piece, he read the difficulty level as 'for advanced players only' and humbly joked, 'So we are not going to touch that one.' Instead, he played a concert solo by Zarchinci followed by a piece by Chrocovski.

Perlman ended his show with music composed by Gymauski, Crystler, and Reese. A pleased crowd gave Mr. Perlman a well deserved standing ovation as he bowed and left the stage.

Melissa Thodos

Dance, Dance, Dance

By: Stephanie Harman

An outstanding performance of strength, form and beauty, the Melissa Thodos Dancers wowed the UMR audience. Photo provided by the Melissa Thodos Company.

On October 5, 2005, the University of Missouri-Rolla had the pleasure to meet Melissa Thodos and Dancers. The company was founded in 1993 by Melissa Thodos herself and creates a combination of classical and modern dance with gymnastics. This style of dance is fast paced, athletic, and entertaining for the onlookers. It is A highly original blend of ballet, modern, and gymnastics. Technically strong, engaging, lovely...they perform with solid strength and feeling, the Chicago Sun Times reported.

Presenting the activities, the Performing Arts Series at the University of Missouri-Rolla showed what they were capable of. They invited and welcomed Melissa Thodos and Dancers to the Leach Theater of Castleman Hall at eight oclock p.m. on the ninth of October. Then, on October 9th the community had the pleasure of registering any area dance students over the age of ten into a dance workshop. This class consisted of a seventy-five minute dance session that was lead by the companies founder, Melissa Thodos.

Dancing the weekend away, Melissa Thodos and Dancers showed UMR a good time. While they were here, they put on a wonderful performance and encouraged area youngsters to pursue dance. In addition, they gave some helpful pointers to area dance students that may someday become as great as Melissa Thodos and Dancers are!

Diwali

Festival of Lights

By: Stephanie Harman

Diwali encompassed several types of Indian music. Photo by Scott Albin

Diversity encompasses the campus at the University of Missouri-Rolla, and the members of the India Association have showed how great their culture really is! Every year the Association marks the beginning of the Hindu New Year, which is seen as a brand new beginning for everyone. To celebrate this joyous occasion, the India Association puts on an annual event entitled, Diwali. A Festival of Lights. It is celebrated to commemorate the victorious return of Lord Rama to his kingdom. All of Rama's people lit lamps in their houses to celebrate the event, and to this day, they tradition of lighting the 'diyas' continues.

This years Diwali was entitled, 'India-A Melange.' Numerous hours were spent by members of the India Association to put on the event. From creating decorations to cooking Indian cuisine for five hundred people the students were kept very busy in preparation for the festivity that was held on November 13, 2005. It was a four hour long gathering from five oclock until nine oclock p.m. and was held in Leach Theater of Castleman Hall, with a cuisine break at University Center East.

The India Association dedicated innumerable hours to make Diwali possible. They had a Festival of Lights to expose others to their culture. Many people from different cultures attended the event and partook in its activities! Everyone that had a chance to experience the event first-hand had the privilege of seeing the Indian culture from a whole new perspective and got to know the Indian culture much more extensively!

Even the Children were allowed to participate in the events of Diwali.

Dance is a major portion of Diwali.

It takes months of practice and memorization to learn a single dance.

Men and women were allowed to participate in the activities.

Arianna String Quartet

A Divine Quartet

By: Stephanie Harman

The members of the Adrianna String Quartet combine outstanding musicianship technical masters of their instruments energy and focus that add up to great music making. The inner voices are never covered; all the parts are brought out and the emotional side is carefully balanced with the thoughtful. In Dvoraks Op. 51 quartet the quartet showed lyricism balance and that thoughtful phrase-making ability the St. Louis Dispatch stated regarding the unbelievable skills of the Quartet as an ensemble. Traveling from Mexico to France and Japan this extremely talented group was welcomed as it made a stop at the University of Missouri-Rolla campus on October 17, 2005. The students and faculty as well as the Rolla community had the honor of seeing this group make an exquisite performance at the universitys own Leach Theater in Castleman Hall at eight oclock p.m.

Putting on an impressive performance the Adrianna String Quartet members showed how great of a work ethic they have acquired over the years. Starting out as kids the musicians spent numerous hours of their lives devoted to their passion music. The group is made up of three violinists which include John McGrosso David Gillham and Robert Meyer. In their company is the lone cellist Kurt Baldwin. First of all John McGrosso has been very active as a violinist. He has obtained his Bachelor and Masters degree from Julliard. Plus he has captured his Performers Certificate from Northern Illinois University. In addition David Gillham completed his Bachelors at the University of Manitota his Masters at Peabody Conservatory and his Performers Diploma from Indiana University. Robert Meyer studied in High School at the Manhattan School of Music while going on to study at the University of Michigan and Rice University in Houston Texas. To add to the musical talent Kurt Baldwin obtained his Bachelor of Music degree from the San Francisco Conservatory and his Master of Music was achieved at the New England Conservatory.

Forming the Arianna String Quartet in 1992 the men have achieved numerous awards. For instance they won the Grand Prize in the 1994 Fischhoff National Chamber Music Competition and they performed over four hundred outreach concerts from 1996 to 2000. Together the members of the ensemble have combined years of musical study with professionalism to get to the high level they have thus far obtained.

The Arianna String Quartet on a roll. Photo by Scott Albin

Wynton Marsalis Plays at UMR

Wynton Marsalis, one of the top jazz musicians in the world today, graced the UMR community when he and his five-piece band performed at Leach Theater on Monday, March 21, 2005. Marsalis has earned nine Grammy Awards, produced forty-four albums, has won the Pulitzer Prize in music, and created Jazz for Young People, which aims to bring jazz to the youth of America. Along with pianist Dan Nimmer, bassist Carlos Henriquez, tenor saxophonist Walter Blandig Jr. and drummer Ali Jackson, Marsalis and crew put on a show that could make anyone into a die-hard jazz fan.

Left: Wynton Marsalis takes a moment to talk about the history of his music. Below: The whole band performs. Photos by Trinea Turner.

The Christmas Schooner

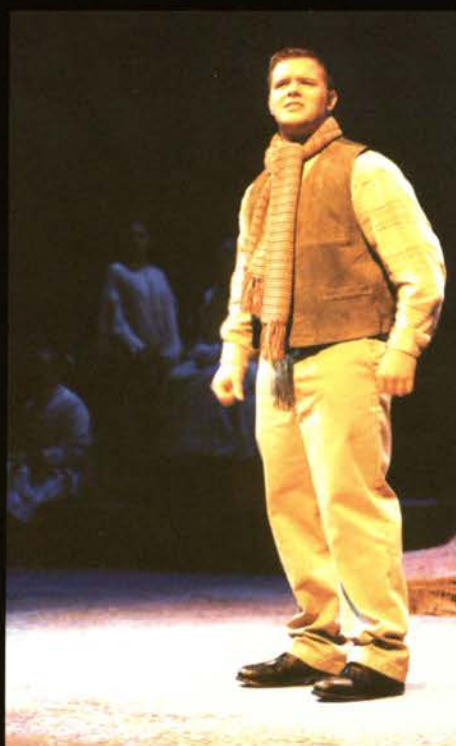

A Christmas Tale

By: Stephanie Harman

During the late 1870s, Peter sacrificed his life as he bravely made his journey across the treacherous, icy waters of the mighty Lake Michigan. He hoped to bring the joy of Christmas into the lives of the German American families that had survived the Great Chicago Fire just prior to the holiday season. Based on a true story, John Keeger and Julie Shannon's musical entitled, "The Christmas Schooner," was shown in Castleman Hall at the University of Missouri-Rolla on November 4th, 6th, and 7th, 2004. It was directed by the University's own instructor of arts, languages, and philosophy, Mr. John Woodfin.

With his fabulous cast, Ryan Irvin, a senior from Mt. Vernon, Illinois, played the brave young Peter Stossel. In his company included Amanda Nisbett, a junior from Rolla, Missouri, who was cast as Alma Stossel; Joey Martin, a junior from Independence, Missouri, played Karl Stossel; and Daniel Bush, a freshman from Bland, Missouri had the honor of bringing Gus to life on the stage. In their presence were many other wonderful actors and actresses as well.

Having been deemed "A marvelous musical...a winner! A perfect blend of story and song," by WGN Radio/TV, "The Christmas Schooner" provided bundles of excitement for families and college students alike. The University of Missouri-Rolla cast has shown how fun-loving, wholesome, and charismatic this musical really is. They worked innumerable hours and made a wonderful musical come to life right here on campus. They brought the viewers joyous memories and started the fall off right with a spectacular show.

From left: Joey Martin as Carl Stossel, Chuck Williams and Jeff Loeffler, two sailors, enjoying the story of the first Christmas tree and a glass of Schnapps. Ryan Irving, Peter Stossel, blessing the family before their meal. Photos by Bob Phelan

Busstop

A Halting Performance

By Stephanie Harman

From Top: Ryan Irving, Dr. Lyman, and Marilyn Emanuel, Cherie, enjoying a cup of coffee while exchanging stories. A confrontation between local sheriff Will Master, Daniel Bush, and eager cowboy Bo Decker, Jim Driscoll. Everyone's sharing stories at Graces Busstop Cafe. Photos by Bob Phelan

Becoming an instant commercial and critical success, "Bus Stop," William Inge, made its first debut on Broadway on March 2, 1955. Nearly 50 years later, it was put to life again by the University of Missouri-Rolla Music and Theater group. The outstanding performance was put on the first weekend of March in 2005, and portrayed a real-life incident that Mr. Inge himself observed. Based on his observations, Inge created the play about pair of young lovers and their struggle to find love in the modern world.

Dubbed a romantic comedy, "Bus Stop" contains characters that are very down-to-Earth and realistic. The play centers on the story of a man and woman that keep bumping into each other at bus stops as well from rural Missouri to Kansas City, Kansas. Every time they meet, the man flirts with the woman and is rejected consistently. Eventually, the woman's heart softens and she gives in to his cleverness and charm. The performance shows the viewer what happens to people who take the risk of trying to live by their talents, beauty, or wits without a penny in the world, homeless, rootless, and on the move.

The UMR Music and Theater group did an outstanding performance portraying the rowdy cowboy, stern sheriff, nightclub singer, hearty truckdriver, and alcoholic professor from the "Bus Stop." With all of their combined efforts and passion for the stage, the play was very realistic. It was very successful in captivating the viewer and bringing them into a world plagued by World War II and enchanted by two innocent strangers that became lovers.

St. Pat's 2005

A Look Into "The Best Ever"

By Stephanie Harman

Celebrating the 'Best Ever' is the main highlight of the year for numerous UMR students, although, one group in particular takes it upon themselves to take St. Pat's to the next level. If you've ever set foot on the Rolla campus, you know who they are...the St. Pat's Committee. One can spot this daring group sporting their snazzy green jackets around campus as they keep trying to outdo the St. Pat's from the previous year. These loyal, dedicated members take numerous hours out of their time to raise money, create enthusiasm, and spread St. Pat's cheer!

The St. Pat's committee spendt a great portion of the year outside in the blistering cold. While their fellow UMR students hustled and bustled to get to class in the wonderful winter weather, the members of St. Pat's spent their spare time standing out in front of the library, in front of the Havener Center, and in various other locations in the great city of Rolla selling St. Pat's gear. They spent months hauling merchandise back and forth to and from these places, trying their best to get people passing by to purchase a St. Pat's 2005 sweatshirt, hoodie, shot glass, etc.

In addition to spending an abundant amount of time selling St. Pat's memorabilia, the committee also put in a lot of time and preparation to make St. Pat's 2005 possible. Some of the many preparations they conducted included the following: They attempted to bring Alice back, they practiced for St. Pat's coronation, and they held St. Pat's Queen interviews. As soon as the preparations were made and the points were totaled, the St. Pat's Court was announced to kick-off the week of festivities! This left the St. Pat's Baby Reps to take care of and watch over the Court throughout the week. They attended dinners that were hosted for them, hung out at their 'Pad', and showed their St. Pat's pride as they dressed the part of the court member they represented!

The St. Pat's committee has existed on the UMR campus for decades, and they have worked so hard to show their love for St. Patrick and the University of Missouri-Rolla. They deserve so much recognition for the time that they put into the event and the amount of dedication they show for the wonderful St. Patrick's holiday! It takes an extraordinary group people to put on an event as big as St. Pat's and the group of people that helped out this year did an awesome job!

Kappa Week 05

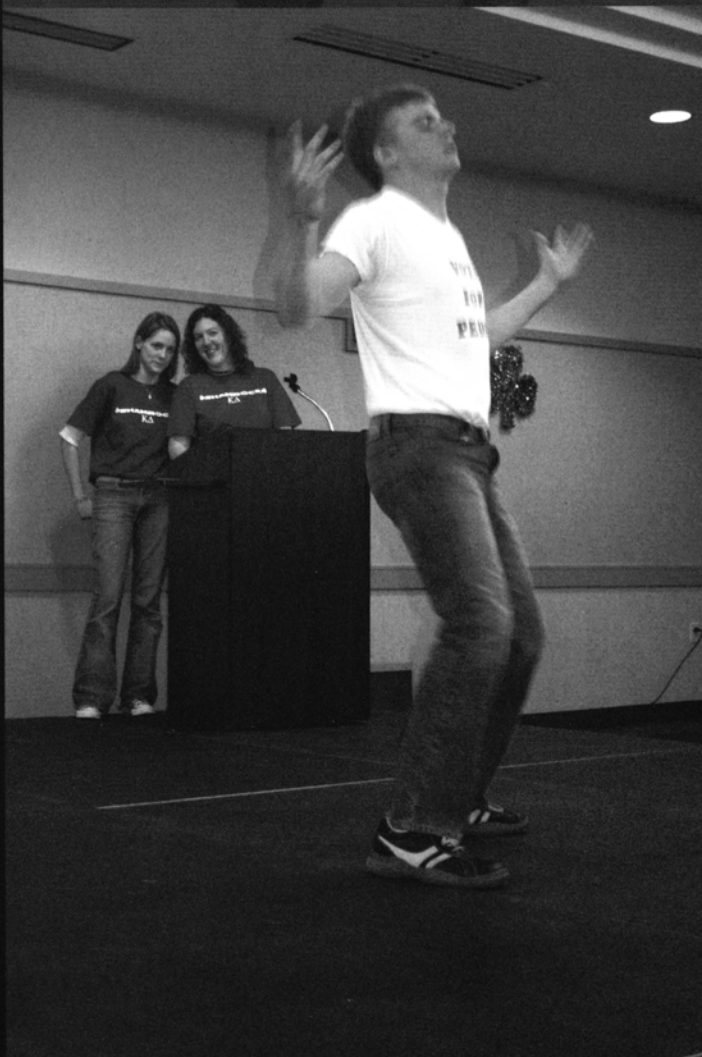

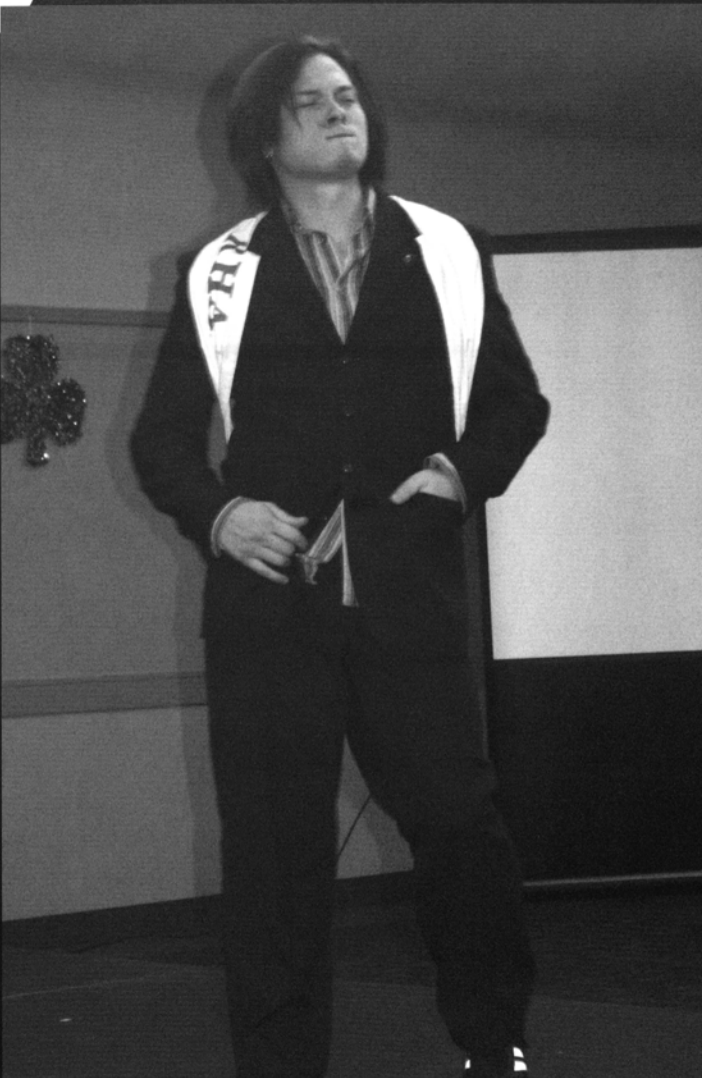

*All Kappa Alpha Psi photos by
Trinea Turner.*

Kappa Delta Presents: **Campus Man**

Looking sharp in formal wear, sexy in beachwear, and expressing their utmost talents, the men at the University of Missouri-Rolla showed what they were made of. The Kappa Delta's annual Campus Man was held, for the first time, at the Havener Center on March 11, 2005. All proceeds from the event benefited Prevent Child Abuse America.

The night started as the gentlemen that were representing different campus organizations strutted their stuff in casual wear. The Swimmers representative walked out in a mullet, cowboy hat, cut-off sleeveless t-shirt, and cowboy boots, for instance. Just minutes later, the men stepped out in their most fabulous beach-wear. Some of the gentlemen stepped out in snorkeling gear, while others threatened to talk off their beach towels proclaiming that they weren't wearing anything underneath.

After the swimwear came the talents part of the competition. The Pikes sang a song and played a guitar, and Kappa Sigma Psi sang an adorable to his music coach. There was also a skit about a time machine from Sigma Chi that was hilarious. In addition there were numerous dancing and singing talents, from 'Build Me Up Buttercup' to 'Barbie Girl.'

Once the events were over, it was time for the winner to be announced. Winning the honor of Campus Man was Eric Richardson from Kappa Sigma Psi. The competition showed everyone a good time full of chuckles and laughs, while supporting a great cause.

Story by Stephanie Harmon.

R H A Snowball

Fire and Ice

By: Stephanie Harman

January 29th, 2005 marked a historical day on the University of Missouri-Rolla campus. For the first time ever, a male candidate was nominated and elected as the Queen candidate for the annual Snowball formal put on by the Resident Hall Association. This dance, entitled 'Fire and Ice' was held in the Havener Center that opened during the Winter 2005 semester. Catered by Chartwells and open to all, the dance provided numerous hours of pure enjoyment for UMR students!

As the lights dimmed low and the music started playing Snowball kicked-off to a great start! People were dancing to the rhythm of the music and enjoying wonderful punch, chicken, cookies, and other various refreshments. The men of floor Eight South of the Thomas Jefferson residence hall even danced there way to the once popular 'Bye Bye Bye' by NSYNC. To add to the festivities, the Royal Court was soon to be announced. As the students up for Queen and King were ushered to the hallway, students continued dancing and enjoying themselves.

Suddenly, a huge hush fell over the crowd as the Court re-entered the ballroom. The music stopped signifying the start of the announcements of the runners up. First off, Laura Ruff and Chris Crowells names were called; they were the third runners up. Only moments later, the second runners up were named. They included Amy Perry and Chris Wright. This announcement left two couples standing. One set was going to become the King and Queen, and the other was the runner up. Then the names of Toni Donovan and Doug Roberts were called as the first runners up. There was one couple left. Hugh Benhart was crowned king and Jonathan Brace was named Queen. With his crowning Jonathan was the first ever male to be nominated, let alone selected, for queen.

Though many believe that the role of Snowball Queen should be handed to a female, the students that voted for the royalty that day begged to differ. They selected Jonathan to be their queen, and he dressed up for the part well in his little dress and high heels. 'Fire and Ice' may have been a memorable snowball for many. Whether it be due to the fact that a male won queen, or because they got to spend time with their friends and/or dates at the ball, the students that attended the festivity were guaranteed to have a memorable night.

You don't have to be a member of the residential halls to attend snowball. Matt Hallam, potential freshman AJ Bedwell, off campus housing and Chris Bales, Quad, all proved with big smiles that they were having a blast. Photo submitted by Patrick Prawitz.

Etiquette Dinner

Helping students be the best they can be...that's the goal for the etiquette dinner. Students are expected to go from Easy Mac and ramen to fancy sit-down dinners with potential employers. Stressful? It can be. But with the help of the Career Opportunities Center, students get a chance each semester to brush up on being the proper dinner guests that would impress even their mothers.

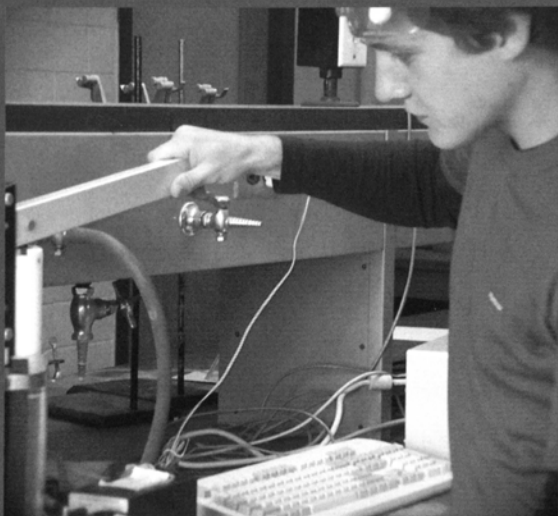

*Students not only get a good meal, but they learn manners as well!
Photos by Tobyn VanVeghten.*

Career fair

Each semester, the top recruiters of the work world come to UMR to see what students have to offer. Likewise, students flock to the career fair to see what employers have to offer. Each participant hopes to end up in a win-win situation whether getting an internship or finding a career.

STUDENT LIFE

Under

Improvements to Campus

Throughout this school year, improvements have been taking place on campus. There is the section of pavement in front of the library, which has been leveled and added to. There is a large concrete oval with bright flowers in it that will look lovely in the spring. Steps now line the sides of the place, and all new concrete has been poured to give this section of campus a rather park-like look.

The Havener Center has been completed. This state of the art building houses a large number of programs and features a new cafeteria and game room.

The residential college, same as the Havener Center, is nearing its completion and should be ready for the students to move into sometime next year. It is looking good, and spirits are high that it will be finished very soon, if there are no more drawbacks.

Construction

Student Life

Miners make a difference

"We all have something to give. So if you know how to read, find someone who can't. If you've got a hammer, find a nail. Join the community of conscience," George H.W. Bush once stated to Americans nationwide. This message is one that numerous organizations and individuals on the Rolla campus have taken to heart. From service organizations to fraternities and sororities, many students at UMR put in hundreds of service hours for the 2004-2005 year!

Serving with pride, the Rolla Chapter of Gamma Alpha Delta has helped out numerous organizations in the Rolla area. They are a service organization that works hand in hand with the Wesley House to provide services to benefit the Russell House and the community of Rolla. This is a co-ed organization that is made up of members of the various local fraternities and sororities.

In addition, the Pi Kappa Alpha Fraternity put on a benefit concert, "The White Trash Turkey Bash," to help out a local needy family. Inviting St. Louis area bands and other local bands to participate in the action, the Pi Kappa Alpha men sold t-shirts to promote the performers and to get word out about what the concert benefited. Not only did they help out a local family, but the Pikes also co-sponsored a dodge ball tournament with Delta Omicron Lambda (DOL) in February to help out the Russell House which was very successful.

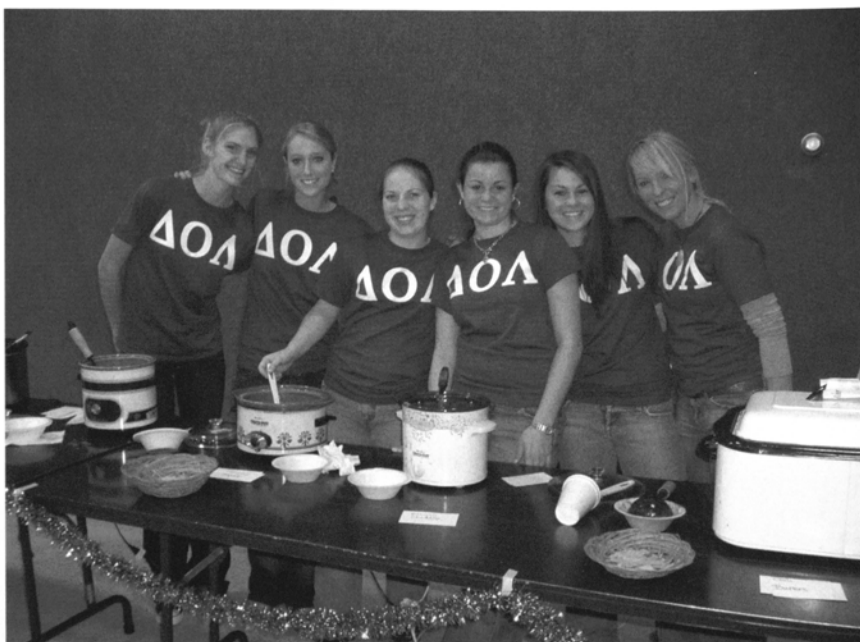

While fraternities provide community service, so do many service organizations on campus. For instance, DOL put on its ever-famous DOL Soup Dinner on December 2, 2004. Many of its members, including Sandy Wagner and Marilyn Emanuel, took up soup donations prior to the event and worked at a table at the Puck to accept tickets from campus students and faculty to attend the dinner. In addition, all of the proceeds from their Soup Dinner went to support the Russell House!

Not only does DOL support the Rolla community, but so does the Eta Theta chapter of Zeta Tau Alpha. The Zetas showed their support in their yearly Campus Kidnap in which the members "kidnap" the presidents of various local fraternities and sororities to collect many items the Russell House is in dire need of. Besides the Kidnap, they also held their annual Volleyball Tournament in the fall and started a new tradition at Denny Ford encouraging people to test drive cars. For every person who test drove, the Ford Motor Company donated a set amount of money to support the Susan G. Komen Breast Cancer Foundation.

Expanding past the Rolla community, the Epsilon Alpha chapter of Kappa Delta supports the Prevent Child Abuse America foundation. They held their annual Campus Man, in which the Rolla campus organizations selected male representatives to enter a beauty pageant the sorority put on. In addition, they sold shamrock bands at the Havener Center to raise money for their philanthropy. Twenty percent of the proceeds from these activities went to Prevent Child Abuse America, while the remaining eighty percent helped out the community by going to the Phelps County Community to prevent child abuse.

From these organizations, many students at UMR were able to either help out the community by buying soup, wrist bands, shirts, or just by test driving cars. Plus, many of the people involved in these organizations, and those involved in other organizations, put in many hours to serve the community in which they spent a good portion of the year. Helping out others is something that many campus organizations pride themselves in doing. As Harry S. Truman once said, "We know that helping others is the best way—probably the only way to achieve a better future for ourselves," and numerous students at the University of Missouri-Rolla have lived up to and exceeded this standard!

Article by Stephanie Harman. Pictures provided by Zeta Tau Alpha and Delta Omicron Lambda respectively.

College cash: Working for the weekend

"It's not hard to make time for something I like," says sophomore Emily O'Nan, a double major in civil and architectural engineering. O'Nan is one of many students employed during the school year, but unlike students who constantly complain about their jobs, O'Nan is proud to work as a UMR student ambassador.

"I basically heard about the job from other ambassadors that I knew," O'Nan says. "I became interested when I saw (other ambassadors) giving tours on campus. I knew that was something I would love to do. It's an awesome job because I get paid to do something I enjoy."

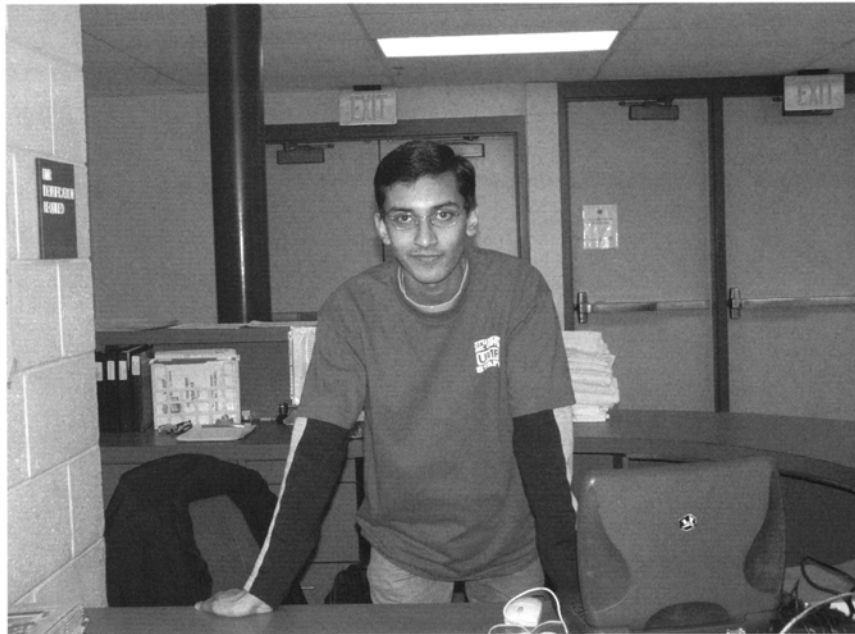

Grad student Ajay Panackal Padathu also works on the UMR campus, staying busy at the front desk of the Gale Bullman Multi-Purpose building.

"I basically help check out equipment like rackets and balls for racket ball," he says, adding that he also checks out items for badminton and ping-pong, as well as, "basketballs, volleyballs... It gets really busy when intramural basketball games are going on."

Despite his hectic work schedule, Panackal Padathu has had no problem balancing his school work with his job. "I actually get a chance to do my homework when things are slow," he says.

O'Nan can't do her homework on the job, but she still practices quality time management. An active athlete for the women's soccer team, O'Nan is also president of Delta Omicron Lambda and M-Club, respectively, and treasurer of the Fellowship of Christian Athletes. Although she has to work hard to balance everything, O'Nan has nothing but praise for her job. "Being a student ambassador has helped me to improve my presentation skills," she shares. "Just talking to all different types of people day in and day out has helped me to become much more confident in my public speaking."

Making money for school is also a plus - and an important reason for many students to work during the school year.

Far upper right: Ajay Panackal Padathu says he can always find something to do when working the front desk at UMR's Multi-Purpose building. Photo by Trine Turner. Emily O'Nan, pictured immediately above (both left and right) not only works as a Student Ambassador on campus, but also stays involved with UMR through multiple other activities. Photos by Amy Edwards. Article by Amy Edwards.

UMR students... trendy?!

Continuing to grow in popularity, wristbands in colors from yellow and pink to green and red are decorating the arms of students all over campus. Supporting various causes and showing unity among students, these wristbands bear such messages as 'LIVESTRONG' — thanks to none other than Lance Armstrong, the cycling legend who visited the UMR campus last year — and 'Until there's a cure,' a statement in support of breast cancer awareness.

A blazer, a baseball cap and crocodile pumps. What could these three items have in common? They all represent growing trends in the UMR student population! Blazers are always acceptable for a night on 'the town,' and there's nothing more endearing than a person who supports their favorite team... whether that team wins the World Series or not. A new winner in fashion is pointy-toed 'pumps.' Dwindling in popularity for the past few years, these shoes are back on the streets and on women's feet. UMR students may not be known for their fashion sense, but they're always more than willing to follow the crowd.

Photography by Trineá Turner.

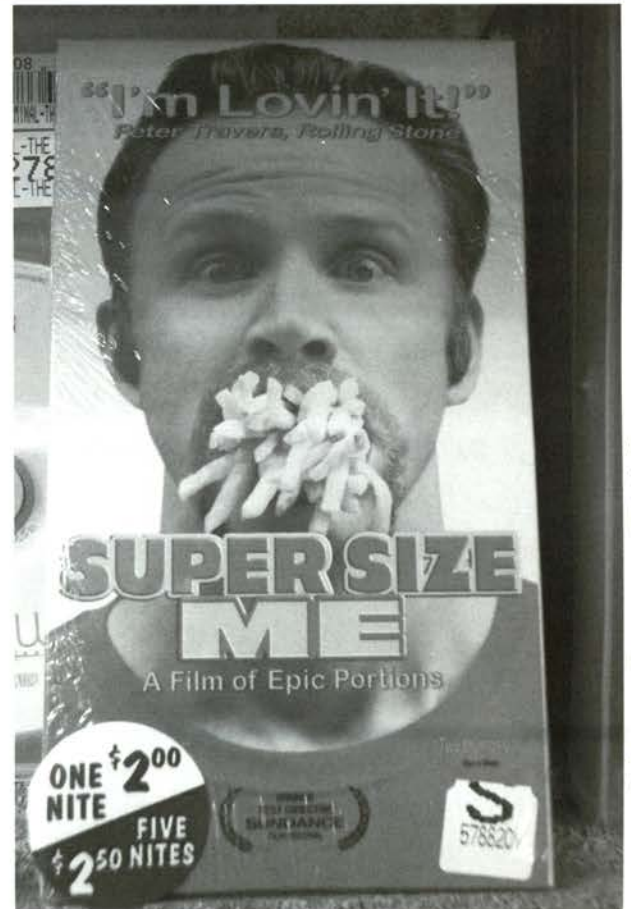

Movies that moved us

Napoleon Dynamite

For most of us, movies about high school never get old. Seeing the past fashions, highs and lows of being a teenager, and reliving the glory days moves us over and over into the theater to see what Hollywood will come up with next. Perhaps one of the best movies about high school ever is *Napoleon Dynamite*.

Napoleon is the gawky, hard-to-like-but-even-harder-to-dislike nerd of Preston Idaho. While stuck in a small town, Napoleon still has a big imagination - ranging from drawing ligers to bragging about his skills with a bow staff. He befriends Pedro, the new Mexican student, while awkwardly connecting with Deb, the painfully shy photographer. Although he hates his ex-jock Uncle Rico and doesn't even get along with his 32-year-old unemployed Internet-chatting brother Kip, Napoleon still finds his niche in the cruel hall of high school bullies and princesses. We finally get to see all of his imagination pay off at the end of the movie, when he helps Pedro in the class elections. The scene in itself is worth the wait.

Perhaps you relate to Napoleon, and perhaps you don't (I assume that many of us at UMR do). Regardless, *Napoleon Dynamite* is 86 minutes of the best movie lines you'll ever find, hilarious situations, and even some confusion that will leave you howling and hoping for a *Napoleon Dynamite 2*.

Super Size Me

Being a college student, fast food value menus are a little gift from heaven itself. What can go wrong with cheap prices and huge portions of deep-fried goodness that will leave you filled, well, until the pizza arrives? According to Morgan Spurlock, plenty. In his documentary, *Supersize Me*, Spurlock, inspired by the recent news stories of two obese teenage girls who sue McDonalds for their health problems, goes on a month long McDonalds binge which takes him to 20 cities across the country.

What we find from this excursion is sobering.

While in good shape himself, Spurlock employs the help of three doctors and a nutritionist in monitoring his health. After just a couple of days, we see Spurlock begin a downward cycle. His doctors and vegan girlfriend beg him to end this diet early. Gaining weight is just the outward sign: His liver becomes toxic, his cholesterol skyrockets, his libido sags, and he gets headaches and becomes depressed.

Supersize Me is an entertaining documentary filled with important messages about the eating style of our country - ranging from elementary cafeteria foods to what we as adults choose. If good eating habits is a goal of yours in the New Year, start out with *Supersize Me*. You will find plenty of motivation to put down those fries and seek a healthier alternative.

Keeping it in the family

Jim DeBerry, BS Mech Eng 1964

Mike Busby, BSCE 1978

Robert Bening, BSCE 1955

Barbara Bening Busby, BS Min Eng 1979

Paul Busby, BS Mech Eng 1970

Jeff Busby, Freshman 2003-04

The trip to UMR is an interesting one. Ask anyone from a state other than Missouri and 9 times out of 10 they have probably never heard of Rolla. So then how do people get here? Well for many engineers this is a well known stop towards fame and fortune, but for others this is just a family tradition.

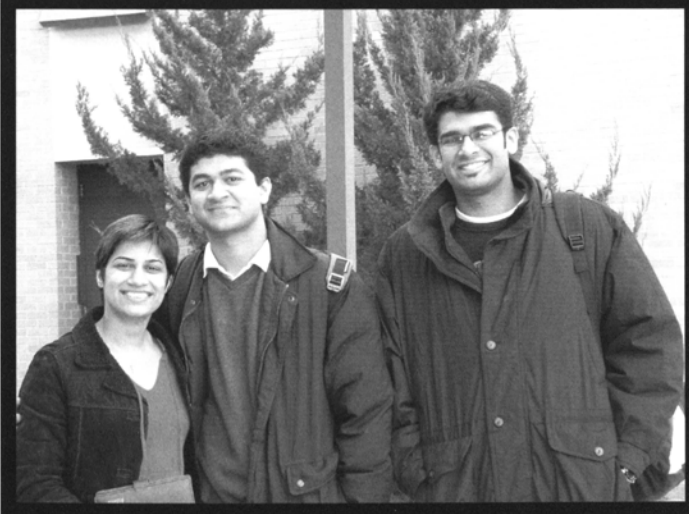

I myself had a little family pressure to attend UMR. Both of my parents were students here at Rolla. My father was in engineering management and also a member of Lambda Chi fraternity. My mother was a part of the math department and was one of the founders of Zeta Tau Alpha. And while that would be enough pressure for some people while I was looking at schools my sister, a petroleum engineer and member of Zeta Tau Alpha, was also giving me a nudge this way. But I can honestly say that is not the reason that I came to Rolla. On the contrary it made Rolla seem like the worst place on earth. I came to visit and fell in love with the atmosphere and the people. So here I am after five years, still in Rolla. I, unlike my family am not an engineer. Hard to believe it but UMR is actually a pretty good school even if you don't want to be an engineer. One advantage to following in my families foot steps, they know all about it. I don't have to explain how challenging the classes are or how enticing the bars are. And it is fun to listen to my parent's stories about the way it use to be.

But don't just take it from me. Here are some stories from other family legacies. Jeff Busby began his engineering career off by attending the UMR engineering camp that is offered over the summer. His parents had suggested he go and check it out since he was good at math and wanted to go to a small school. But in reality Jeff knew much more of engineering even before that point. Jeff's mom and dad both had attended Rolla. His father got his BS in Civil Engineering and his mother got her BS in Mining engineering. But it does not end there. Jeff also had the pleasure of learning about engineering from his uncle Paul Busby and his great uncle Jim DeBerry both in Mechanical engineering. Jeff's grandfather Robert Bening also graduated from UMR with his BS in Civil Engineering. UMR has a wide variety of engineering majors to choose from and Jeff had a little insight on quite a few. In the end he decided to go into a field his family wasn't necessarily an expert in, Engineering Management. But Jeff's mom is probably helping out a little. She is the Vice President of Peabody Energy. She started from the ground up, just this past summer Jeff got to work in the department she started in with some of the same people she worked with. Now that is a family tradition.

There are many more students on campus that are second generation miners. Some are even third and fourth generation. I guess that means that Rolla really is not that bad of a place to be. Keep that in mind when it is your kids turn to go to college (UMR does offer a really nice sons and daughters scholarship to those out of towners).

Story by Traci Holcomb and photos provided by Jeff Busby.

Exchange Students

Photos by: Trinea Turner

Name: Samir Raorane

From: Mumbai, India

Major: Computer Science, Year Enrolled: Fall 2004

Why did you choose UMR?

I was the best option I had and UMR has good courses related to my areas of interest.

Was it hard to adjust to UMR?

No, not at all. The people here have been very helpful and caring. They have been very friendly and the people whom I am close to treat me as family.

What are the advantages of being here?

The education system is really good. Also I get to learn about American culture which is completely different from my own.

Name: Apurv Jawle

From: Mumbai, India

Major: Masters in Information Science and Technology (Fall 2004)

Why did you choose UMR?

"Best among the lot! Apart from that, good reputation in the mid west region, and IST, a good interdisciplinary course."

Was it hard to adjust to UMR?

Not really, apart from the Missouri weather?

What are the advantages of being here?

Responsibility with independence.

Name: Parul Khaneja.

From: New Delhi, India

Major: I am a grad student, majoring in Engineering Management.

Why did you choose UMR?

There is a lot of research work going on in the Eman Dept. Hence, more chances of getting funded.

Was it hard to adjust to UMR?

I didn't find it hard at all to adjust in Rolla, people are very friendly. I really enjoy my stay in Rolla.

What are the advantages of being here?

Everything is so easily accessible. It's a small place still, mostly everything is available.

WELCOME

Freshman Week 2004 once again saw the excitement of several students, journeying from home after packing their bags (and blankets and basketballs and microwaves) to move to Rolla, the middle of everywhere. PRO week, also known as Preview, Registration and Orientation week -- or even plain old "Opening Week!" -- gives students their first taste of college life, arriving on campus a week before classes start. Undergraduate enrollment on the first day of classes at UMR was expected to be 4,052, an increase of 14 students over last year's record figure of 4,038, according to Laura Stoll, UMR registrar. The undergraduate enrollment is now more than 12 percent larger than that of fall 2000.

The trip of a lifetime

by Traci Holcomb

For at least four years students get up, go to class and go home. Nothing too exciting, pretty much the same thing every student in the world does. During summer 2004, however, Dr. Robert Laudon took twenty students on a class trip that was unlike any other. For six weeks these students participated in a field camp in South Africa.

In cooperation with the University of Western Cape, the students spent several hours a day attempting to do geology work. Nights were spent writing reports of what they had discovered that day.

Although this was an educational trip, it did not stop them from being tourists and celebrating that they were not in Rolla. They traveled to the Cape of Good Hope, as well as Robben Island, the location of Nelson Mandela's imprisonment. They also took a trip to Kimberley "Big Hole" diamond mine and visited an African winery.

This trip was an opportunity for these students to understand more about geology, but it also presented them with the chance to experience life unlike their own. They saw townships as well as exclusive parts of South Africa. They witnessed Africa trying to emerge from Apartheid, and witnessed first hand the pride and enthusiasm Africans have for their country.

While returning from their visit to Robben Island the students stumbled upon a celebration. They were fortunate enough to see the Olympic torch coming through South Africa. Jenn Allen, a senior in Geological engineering, was on the trip and described this celebration by saying that it became extremely clear hearing the drums and seeing the traditional African dancing that they were all in an extraordinary part of the world. For these students, this truly was the trip of a lifetime.

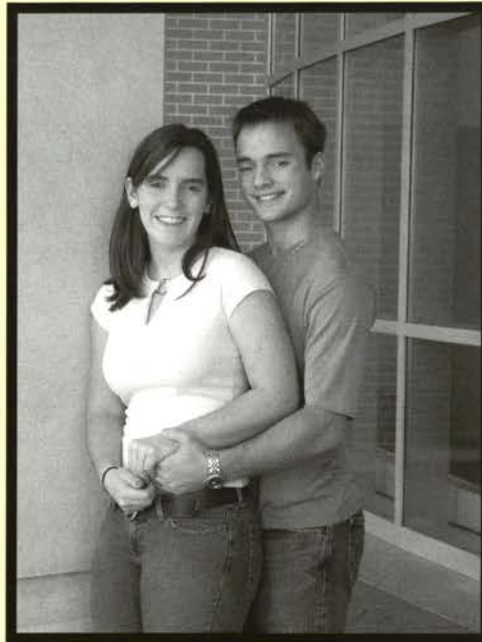

BUILDING RELATIONSHIPS

Forever

Rodrick McDonald
and Jamie Webb

Justyn Albert and Sabrina Jones

Nathan Williams and
Trinea Turner

Just friends/Long time love

Relationships are complicated and not easy to maintain. It does not matter if you are "just friends" or long time lovers you have to work at it. And if after all that you still aren't sure what to do you can ask these people who have, somehow, figured it all out.

or Just Friends...

Embarrassing Moments

**Some Embarrassing Moments-
Be Glad You Are Not One Of These People**

Jen Allen

Holly Weinberg

Everyone has those times in life when you wish no one had been around to see you do that stupid thing that you just did. But that is part of life. It has happen to me and I am sure it has happened to you. Keep that in mind while you read the horrifying moments that these people were willing to relive.

Jen Allen a senior in geological engineering recollected: My freshman year of soccer started out with a multi-game tournament up in Minnesota. Our coach grabbed our uniforms and all of the equipment for the bus ride on a chartered bus. It was cold, but the tournament went fine with no major problems. Since tournaments take place over the weekend period, we also had other games scheduled for the upcoming week. Freshman classes are very stressful and trying to explain to your teachers that the reason you did badly on the quiz was because you had soccer games did not always go over well. Neither did telling the same teachers that you had to miss class for an away game. By Thursday of that week, my stress level was pretty high, and I was getting ready to load the vans for our game against rivals, Southwest Baptist. I thought that I had packed everything plus some. However, when we were getting dressed in game wear, in front of the whole team, I asked the question, "So, who picked up the uniforms because I need to get mine." I was not only mortified, but I had a whole team of older girls, and a coach that was extremely upset when I realized I had to grab my own before we left. It was the most embarrassing and scary moment for me at UMR.

Holly Weinberg a freshmen business management major said: One day I was walking out of civil and tried to walk down the hill instead of the stairs. Well I slipped down the hill and an old man ran up to me to try and help me. I was so embarrassed that I just jumped up and acted like I was talking on my phone and ran away!

Marilyn Emanuel a sophomore in metallurgical engineer recalled: Just last week I was complaining to the head of my department how scary and confusing one of the text books was. Apparently he wrote it. I should've paid attention to the byline on that one!

Moments like these you never forget and they are the ones that you really would like to forget more then any others. It happens though, and there is nothing you can do about it. Stay strong, stay confident, and most of all stay on your feet!

**Story by: Traci Holcomb
Photos by: Traci Holcomb and UMR athletics**

Wish you were here!

Things to do, places to go: The hidden thrills of Rolla

"There is nothing to do in Rolla" is a common statement heard from many students. Although we don't have big night clubs and big fancy bars there is plenty to do if you look for it.

The first and most obvious reason people can't find things to do is because they are under age. Many of the attractions here are bars. The most popular place is the Grotto. Many under age students have heard of it, but almost none have seen it. There is definitely a college bar atmosphere going on with the cement floor painted green, of course, as well as pool tables and a constant haze of smoke.

Across the street is a fairly young hot spot, All Stars Sports Bar. In its former glory it was a theater. The first transformation was an attempted at a night club. Seeing as this is Rolla, a second transformation took place. We now recognize it as All Stars. There's more of a family vibe from this place seeing as how the whole family helps run it, and there is actually a menu involved. The giant television screen is also a crowd pleaser as long as you like what is on it.

I would like to take a minute to salute a fallen hero. This year we lost a beloved friend of the community. The Tater Patch buckled under the pressure that the good town of Rolla provides. Although The Patch, as most people called it, was not a huge college hot spot it definitely had its regulars. The townies that would hit on you, the plywood floors, and the license plate décor will never be forgotten.

Even though Rolla is such a small town there are so many bars. Still on active duty we have Jimmy's, the Top Hat (which just recently reopened under new management), and The Pub Mobile. This article would not be complete without mentioning Thirsty Thursday's at El Maguey, and also under new management Bruno's.

But what about those people that do not spend every night out at the bar. And yes those people do exist in Rolla contrary to popular belief. Our campus actually provides several events such as comedians, concerts, movies, plays, dances, and more. Almost every religious group on campus has an organization and a building they can be at. There are also places connected with town. A Slice of Pie is a great place to go to spend time with friends and they also have some of the greatest pies I have ever tasted. And as sad as it is for me to put this down in writing there is always Wal-Mart.

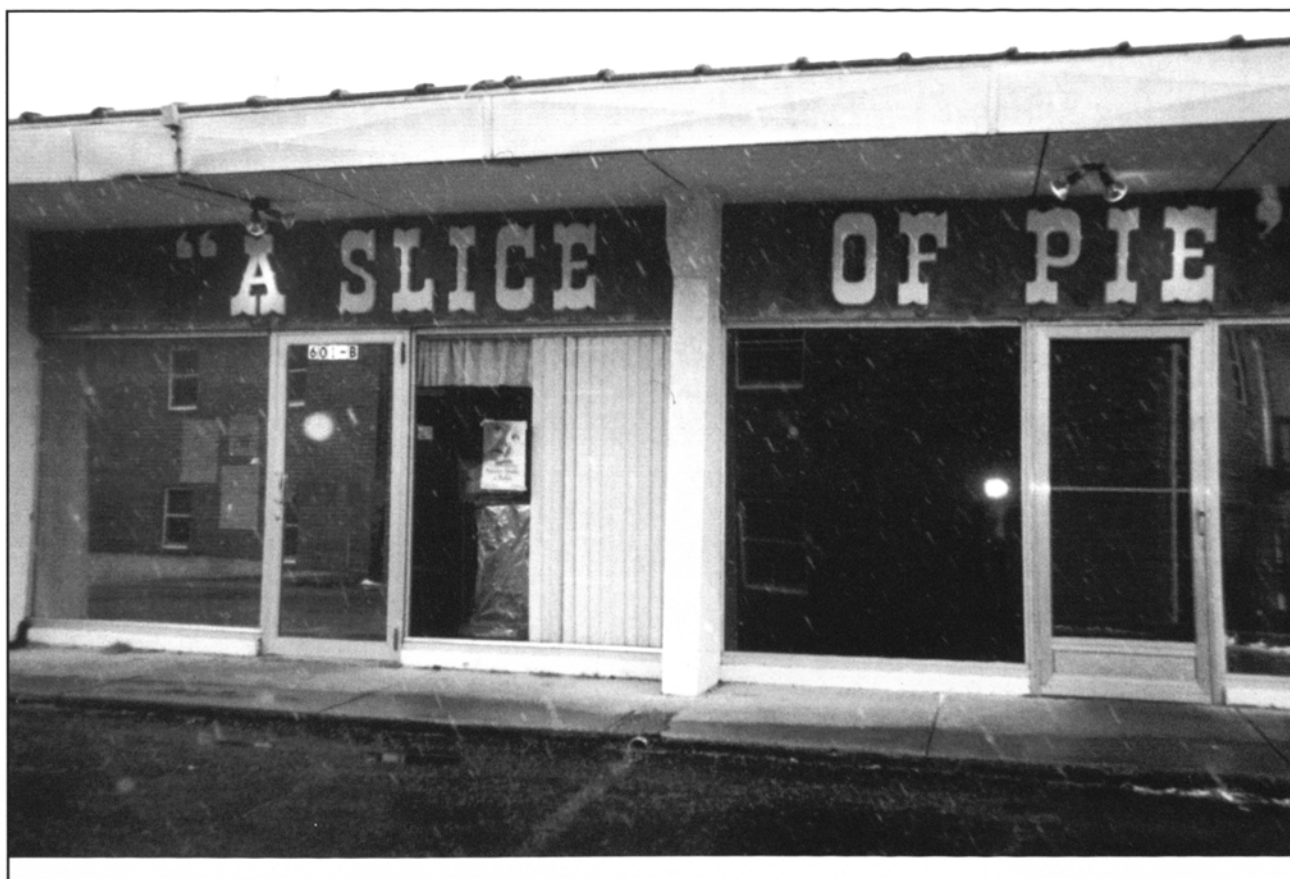

So the next time you say there is nothing to do stop and look around you. Although activities and fun won't just jump out and say "Here I am" there are things to do if you look for them.

Story and photos by Traci Holcomb.

From Bruno's and Jimmy's to the Uptown and El Maguey, there are several places to spend time in Rolla, hanging out with friends and socializing with friendly strangers. Not 21? Places like A Slice of Pie offer a nice alternative, with good, clean and non-alcoholic fun!

Photos by Traci Holcomb.

UMR Solar House: No Electric Bills "Here comes The sun!"

It is a well known fact that the university requires students to live in campus approved housing for at least two years. And until fall of 2004 the only options were the dorms and joining a sorority or fraternity. Allison Arnn, the project manager for the new 2005 solar house, got the opportunity to change things a bit. Last fall Allison was selected to live in the 2002 solar house. Many have seen the baby blue house with the white shutters on the corner of 10th and Poole, across from the Multi-purpose building, but not many know what it is all about.

The solar house was built for the 2002 Solar Decathlon in Washington D.C. The UMR team competed against eighteen teams in the series of ten competitions, finishing ninth overall. They also took home first in refrigeration, second in energy balance, and third in hot water.

Once returning from the nation's capital, the house was reassembled off campus and Allison moved in. In an article done by Women's World magazine Allison admitted "I wasn't sure about it when I heard I'd been picked to test out the house by living in it." But at the time of the article everything was smooth sailing for Allison. She pays \$300 rent a month and no more electric bills. The one complaint by Allison, "I have no wall space, a lot of windows and doors. The design team needs to work on that."

And have they. The 2005 solar decathlon is rapidly approaching, and the team is ready and raring to go. Many of you have seen the house being built on campus at the old bonfire location. The team wanted a house that worked efficiently and could travel to Washington D.C., but that was also appealing to the eye. The design idea: The Fibonacci sequence. In mathematical terms any number in the Fibonacci sequence is the sum of the previous two numbers in the series (0, 1, 1, 2, 3, 5, 8, 13, and so on.) As these numbers reach infinity you can divide a number by its predecessor and get the Golden ratio of 1.618. The challenge was to incorporate this theme into an actual layout for the house.

Story by Traci Holcomb.

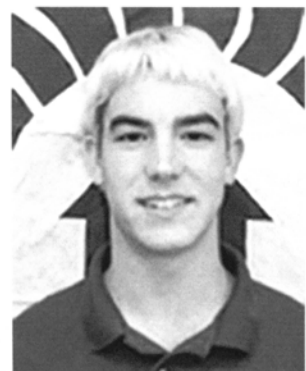

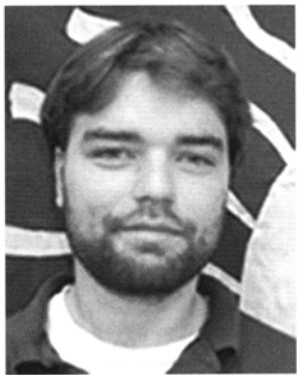

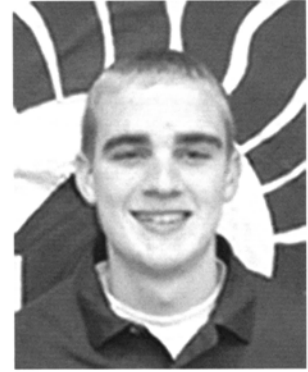

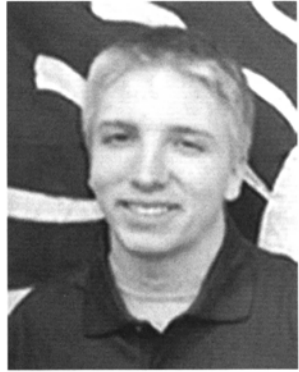

A Solar House Cast of Characters

Left, top to bottom: Nick Bristow, Chris Claussen, Brandon Cotter, Courtney Green. Below: Adam Tiehes. Right, top to bottom: Chris Krueger, Joe Schaefer, Patrick Williams, Chris Wright.

"As a freshman, majoring in Architectural Engineering, I have been on the UMR/RTL Solar House Team since Fall 2004. I have been involved in the transportation team, which plans how the new 2005 house is going to get on the Mall, in Washington, D.C., communicating with companies for donations, and I have helped with the construction of the house." --Chris Krueger, Chief Engineer.

"I am a second year Solar House team member, a student in Civil and Architectural Engineering, and currently serving as the Engineering Action Officer (EAO). I joined the team because I like to see building projects go from idea to reality. As the EAO my job is to track member's attendance, collect dues, and keep records of donations. As a team member I am constructing the house and asking individuals and businesses to support the team with monetary gifts." -- Brandon Kotter, Engineering Action Officer.

solarhouse.umn.edu.**

Resident

Designed to “take the concerns of residents and respond by keeping residents informed, provide informational programming and social events, and be the voice of the residents to the Residential Life and Student Support Programs Department of the University,” the Residential Hall Association (RHA) at UMR has proved to be a very beneficial program. RHA had a very successful spring semester in 2005. Not only have they donated money to other organizations, but they also put on numerous socials for the students to enjoy!

During spring semester 2006, the Residential Hall Association put out many donations at the University of Missouri-Rolla. Among their donations, they gave \$800 to the Chinese Students and Scholars Association for their Chinese New Year Festival. In addition, they also gave \$3600 to put on alternate programming for St. Pat's in order to direct attention away from drinking and allow residents to have an awesome time! Included in these activities were movies and makeovers, a presentation by comedian Buzz Southerland, and games about alcohol awareness.

Not only did RHA donate an abundant amount of money for other programs, but they also put on numerous activities for the students to enjoy. They supported and directed Snowball, which is the residential hall's formal entitled Fire and Ice. IN addition, they ran a program in April called, “What a Night of Gaming” (WANG). This was a full weekend of network gaming fun! To add to the enjoyment, RHA put on a Stop Light Dance and a Reindeer Romp. The dance was put on for the students, but this wasn't any ordinary dance, because they had to either wear green (if they were single) or red (if they were taken). On the other hand, the Reindeer Romp was a 5K fundraiser that brought a lot of excitement!

RHA did a ton of activities spring semester that not only benefited the residents at UMR, but helped out the community and campus as well. They donated over \$4500 to outside organizations, and they provided great entertainment! RHA has had a very successful year, and have only one way to go...forward.

Story by: Stephanie Harman

Residential Halls

TJHA

Putting on dances, providing entertainment for residents, putting on a party as the New England Patriots headed off with the Philadelphia Eagles, and celebrating St. Pat's in a way unlike any other, the Thomas Jefferson Hall Association (TJHA) worked hard Spring Semester 2005 to bring Thomas Jefferson to life! They put on dances, raves, movie marathons, a poolabalooza, and various other activities to show how much fun living in the residential halls can be. Working hand-in-hand with the Residential Hall Association, TJHA was able to bring these various activities to the students.

Thomas Jefferson Hall Association showed what they were capable of this semester as they provided a DDR Rave (Dance Dance Revolution). This was headed by two freshmen in Thomas Jefferson's South tower, and proved to be a huge success with over sixty people showing up. Not only did they put on the rave, but they also put on some exciting competitions. A mural competition was held where floors painted their study lounges or some other part of their floor using their floor funds and seeing who had the best mural! In addition, a mini movie marathon was held. To achieve this, students could get together and make mini movies to see which person or group of people created the best mini movie!

In addition, TJHA held a Super Bowl Party in the TJ South lounge as the Patriots played the Eagles in Super Bowl XXXIX. Besides putting on parties, TJHA also put on a movie and a makeover directed toward the female students. This included a movie followed by a Mary Kay makeover. In addition, a Poker tournament was held by TJHA that was very successful! TJHA has also helped out RHA this semester by helping out

QHA

Forming the Quadrangle, Altman, Kelly, McCarney, Holtman, and Farrar have the power to impact a large amount of people. The Quad is headed by the Quadrangle Hall Association (QHA), which achieved so much in the spring of 2005. They helped out and competed in St. Pat's, hosted a sand volleyball tournament, and participated in Campus Man.

The Quadrangle started off the semester right when they sponsored Chris Cromwell for Kappa Delta's annual Campus Man competition. After this male beauty pageant, it was time to start preparing for the 97th annual Best Ever St. Pat's! To get ready, the residents of the Quadrangle got together and built an outstanding, giant cudgel. This cudgel was massive, finely carved, and skillfully painted for the cudgel competition. Besides making a cudgel, QHA also helped host movies and poker tournaments to provide entertainment for the Quad residents during St. Pat's. In addition to these events, the Quad also participated in the Gonzo games during this very green week, where they won first in women's volleyball! Not only did they play in the gonzo games, but they also had a booth for the St. Pat's carnival. This booth was a giant jumping castle for the younger kids to enjoy.

While they may have participated a lot in St. Pat's, QHA also organized and participated in other various events. One of these events helped to them end their semester right. They held one of their traditional semester volleyball tournaments. This tournament was a two on two competition between either men's, women's, or coed teams. By selling shirts showcasing the tournament and charging for team registration, this competition proved to be a very successful fundraiser for QHA!

The Quadrangle Hall Association has had an eventful semester with it's various involvements. They put up a fight in the St. Pat's competition, sponsored a candidate for Campus Man, and put on a great sand volleyball tournament to say the least. This program is great at getting the Quad residents involved, while listening to and considering their opinions.

UMIR

RESIDENTIAL

HALL

STAFF

Name: Kelly Jacobs

Floor: TJ One North

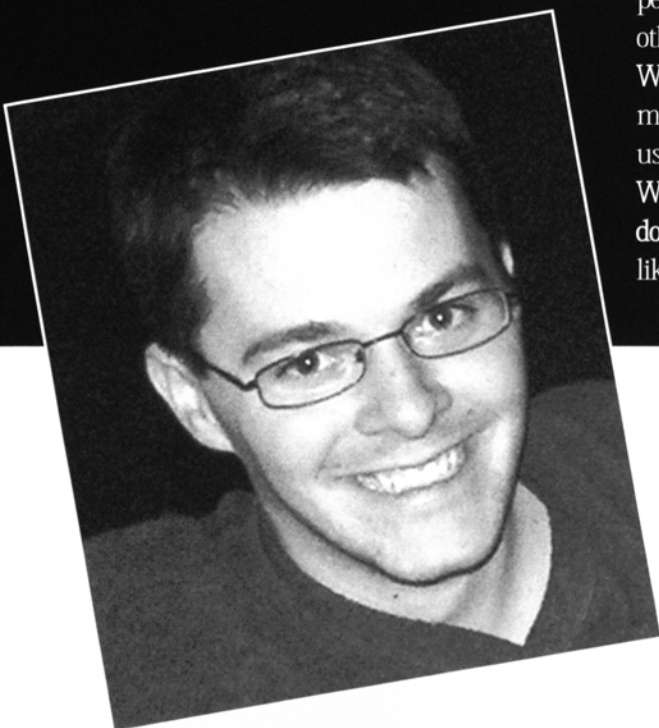

Major: Computer Science

Why I wanted to become an RA: Mostly, I wanted to meet a lot of people. I did too, and I ended up meeting a heck of a lot more people than I expected. Also, I wanted to be more active, but I guess in a responsible way, if that makes sense. That's worked out so far too.

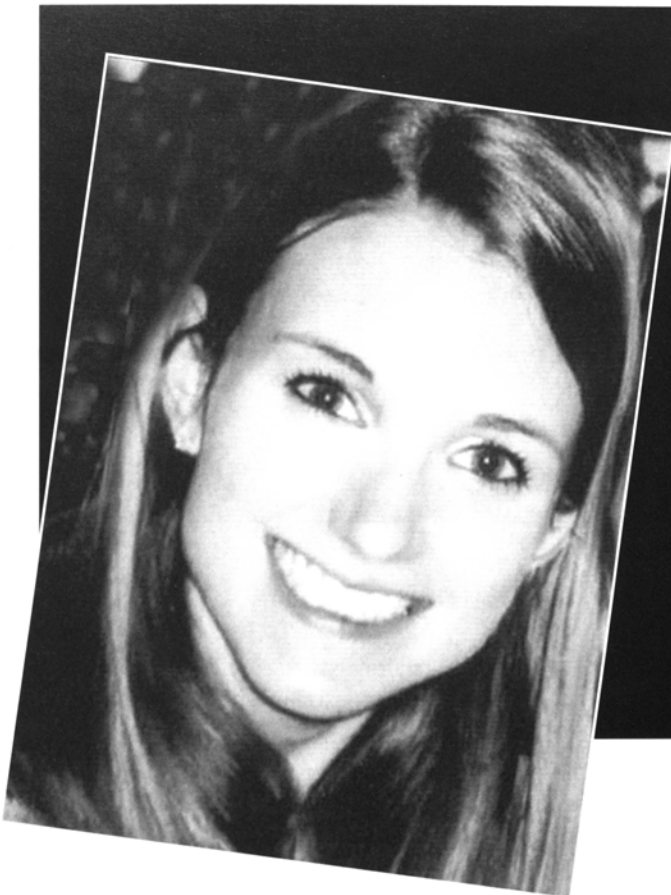

What I like about being an RA: I still have all the free time I need, which worried me in the beginning. And once again, it's fun to know so many people. In the first month, I became good friends with 100+ people. On the other hand, I have a tough time remembering new people I meet.

What I don't like about being an RA: Sometimes people I don't know treat me like an authority figure instead of a regular guy, and I guess I'm not used to that. But usually that wears off when they get to know me.

What was the one thing I've had to do as an RA that I wish I never had to do: Probably give a tour. It didn't end up being too bad, I guess I just don't like speaking in front of a group.

Kelly Jacobs

Name: Brittany Abernathy

Floor: RC/7NN

Major: Psych/Ed

Why you want to become an RA: I had a great RA when I came in as a freshman, and she really helped me to adjust to college life and get involved. I hoped that I could do the same for this year's freshmen.

What you like about being an RA:

What you don't like about being an RA:

What was the one thing you've had to do as an RA that you wish you never had to do:

Brittany Abernathy

Name: Alias "Chi" Tagami

Floor: The Palace

Major: AeroE

Why you want to become an RA: So that I could make living in the halls fun. Not just for others, but for myself too.

What you like about being an RA: You learn a lot about yourself and others in the job. I have made some very important friendships with fellow RAs and residents.

What you don't like about being an RA: I hate that people don't see all the hard work that the hall staffs put in to making Res Life a fun and rewarding experience.

What was the one thing you've had to do as an RA that you wish you never had to do: I had to do third shift duty during St. Pats, talk about a bummer.

Chi Tagami

Hotel RollaMO..

Once you have been accepted into UMR they send you that thick envelope that has all of the information you would ever want and more inside. More specifically it has all of the campus approved living arrangements. And then you have to choose. This event hasn't changed from year to year or from college to college for that matter. One thing that was different however were the chooses. The freshmen class of 2005 had the option of living in the new dorms. Come to find out they had the option but not the ability. Everyone has seen and heard about the delayed construction of the new residential facilities. This meant that all the students that were signed up to live there had to make new arrangements. Well the university figured something out, hotels. Yes, I said hotels. These students were told they would be living in a hotel while the new dorms were being finished. After hearing the news would be resident Erin Houston said "At first I was thinking that it would be a huge hassle because I figured hotel guest would be coming in and out, but then I found out about the pool and I felt better." Alex Goodson, another student said, "I was disappointed but at the same time I figured being able to say I lived in a hotel was kind of cool."

And boy was it cool. The hotel was every freshman's dream come true. It was like being at home without the parents. The females were in suites with queen size beds. The males were not as fortunate but still lived large in their full size beds. A maid service would come to their rooms once a week and clean up, only if they could make it in the room though. They were not allowed to touch anything on the bed. So if you wanted clean sheets you had to clear it off before they got there. Also, it had a bathtub. I can remember back to my dorm days longing for a bath every once in a while. There were also only two people to a bathroom, so much better then communal showers. There were other little things that they all enjoyed. The indoor pool, wireless internet, cable television with HBO, and being able to park close to where you actually live just to name a few. But the hotel wasn't all sunshine and glitter.

Tyler Cobb, who definitely enjoyed the perks, was also irritated by the distance. "You couldn't just run home and pick up your books for your next class. You had to have everything with you that you needed that day." I know we all saw the big yellow buses driving around campus picking people up and dropping them off, they would circle every half an hour. "Your whole day had to be planned around the bus schedule", remarked Alex. The food situation was also less then desired. Apparently the dinner at the hotel was lunch at one of the cafeterias on campus. So, more times then not these poor kids had to eat the same thing twice in a row. Because as mentioned before they had to stay on campus until they were done for the day.

So now that the adventure is over and done with I asked these students what they liked better, the dorms or the hotel. Tyler votes for the dorms "I would have to say the dorms just because of the convenience." Erin shouts for the hotel. "Definitely the hotel! The Hojo, as we so affectionately called it was much bigger then my current room in Kelley Hall. The hotel was much more fun. Seriously, come on it was a hotel!" And lastly, Alex isn't quite sure. "The dorms are nice just because they are on campus and so much closer to everything, other then that I really miss the hotel. It was a tough transition."

That statement pretty well sums up the feelings of these students. Although it was disappointing to hear they wouldn't live in the new dorms these students made the best of the situation handed to them. And in the end miss it. "It's a once in a lifetime chance, how many college kids can say they lived in a hotel for a semester?" Alex said explaining her experience.

C. SPENCE

ROLLAMO PRESENTS

STUDENTS MEET THE STARS

Above: UMR student Cory Spence and father Steve Spence (Left) attend a taping of the Late Show with David Letterman. After the show, both Cory and Steve get to meet the crew of the Late Show including David Letterman and his driver. Cory does this while representing UMR, wearing his campus sweatshirt.

Above: Geoff Bieniek (Right), son of UMR Physics Professor Ronald J. Bieniek (Left), pilots a catamaran with 'Indiana Jones' him self Harrison Ford.

Below: UMR student Cory Spence runs into 'Ghostbuster' Dan Aykroyd at a Circuit City in St. Louis. Aykroyd was acting as spokesman for Charter Communications. Remember kids, 'the dish is a disease.'

OPPORTUNITIES FOR UNDERGRADUATE RESEARCH EXPERIENCE PROGRAM

Looking for an opportunity to get research experience under your belt before grad school? Through participation in our Opportunities for Undergraduate Research Experience Program (OURE), you'll become a junior colleague, working alongside outstanding faculty on projects that they have proposed, or you may have your own research proposal accepted.

Need more incentive? Don't forget that an OURE offers compensation for your time. Contact the Office of Undergraduate and Graduate Studies in 207 Parker Hall for more information!

spotlight on

David Oswald

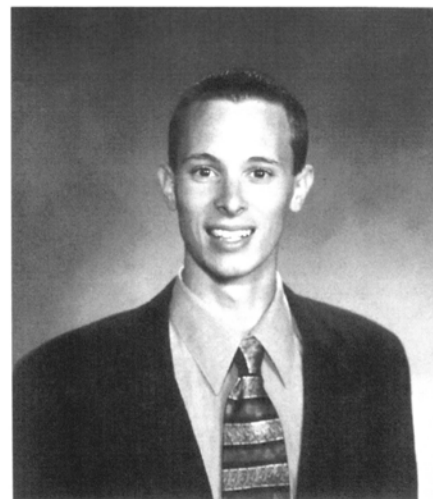

Hometown: Webb City, MO

Major/Degree: Electrical Engineering / BS

Plans after graduation: There is nothing set in stone as of yet. I would just like to get a job where I enjoy waking up and going to work every morning. Beyond that, I want to settle into a nice community with my family and finally own my own home.

What will you miss about UMR? I will dearly miss my church. Over these last few years, my wife and I have become very involved with Ft. Wyman Baptist Church. The people there are like no other and we will have great difficulty finding another church like it.

Advice for future UMR grads: Get involved in the community! Look beyond the activities offered on campus and become a contributor to society because wherever you live the community will always need your active participation to function properly. Don't ignore the importance of what your neighborhood and city can offer both you and your family.

-David Neely

What are you plans for the future?

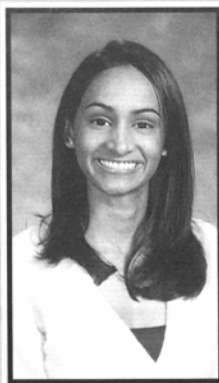

I'm going to graduate school, then hope to get a job doing aerodynamic research and development.

-Keith Norton

What was you hardest class at UMR and why?

EM160 - I highly dislike 3-D math.

Who was your favorite professor at UMR?

Dr. Schramm - history - fun guy and great teacher.

-Addison Raine

What do you intend to forget about UMR immediately after leaving town?

The homework!

-Asha Rao

What advice do you have for underclassmen?

Don't worry if you've put something off til the last minute; your best work will come as a result of working under pressure.

SENIOR

SURVEY

What do you intend to forget about UMR immediately after leaving town?

Dr. Nelson

-Jennifer Speidel

What are your plans for the future?

Start a life - buy a corvette (year undecided), get married and in the very far future have a couple of kids.

-Jason Stadt

What advice do you have for underclassmen?

Enjoy it to the most.

-Matthew Stalling

Who was your favorite professor at UMR?

Lance Haynes. I've never known a prof to have so much fun in and out of class.

-Joy Stein

What was your hardest class at UMR?

Orbital Mechanics - the concepts were hard to grasp but I still enjoyed the class.

-Abbie Stewart

What will be your fondest memory of UMR in ten years?

I was the only girl in the mosh pit at Freaker's Ball 2004

-Jacquelyn Stroble

SENIOR SURVEY

What do you intend to forget about UMR immediately leaving town?

Rolla.

-Sofia Tan

Who was your favorite professor at UMR?

Dr. Pernicka

-Aaron Ticknor

What are your plans for the future?

Obtain an MBA while working full-time and create my own company.

-Angel Uruchima

Who was your favorite professor at UMR?

Dr. Carol Ann Miller

-Jayson Vucovich

What advice do you have for underclassmen?

Don't cross highway 63 at 9th street - there are crazy Rolla drivers and one of them hit me and I had to go to the hospital and then wear a sling and brace for 2 1/2 months.

-Auburn Walker

PHOTOGRAPHER

From the Editor

I was pleased with the talent of the Rollamo staff this year. I think that our photographers did an excellent job capturing history on our campus. However, many times they did not get to express their creative side in their assignments. That is why this edition of the Rollamo features a photographer showcase. I asked our photographers to submit their favorite photos for this showcase, and I hope that you enjoy them as much as I have.

GEOTECHNOLOGY, INC.
ENGINEERING AND ENVIRONMENTAL SERVICES
ST. LOUIS • COLLINSVILLE • KANSAS CITY

*Congratulations to the Class of 2005 From Our
UMR Alumni and All The Employees of
Geotechnology, Inc.*

Philip A. Jozwiak; B.S. 1966, Prof. C.E. 2000

Dominic J. Grana; B.S. 1972, M.S. 1975

Ronald F. Williams; B.S. 1980, M.S. 1981

Dale M. Smith; B.S. 1981

Jeffrey P. Klein; B.S. 1982

Dennis F. Boll; B.S. 1981, M.S. 1982

William C. Jones; B.S. 1986

Karen Albert; B.S. 1992, M.S. 1994

Richard M. Solomon; B.S. 1983, M.S. 1994

Matthew H. McQuality; B.S. 1993, M.S. 1996

Michael S. Roark; B.S. 1997, M.S. 1998

Yingwei (Alex) Wu; M.S. 1995, Ph.D. 1999

Eric J. Neuner; B.S. 1991, M.S. 2001

Glen L. Adams; B.S. 1997, M.S. 1998

Craig K. Kaibel; B.S. 2003, M.S. 2004

*Offering outstanding opportunities for outstanding graduates in
geotechnical and environmental engineering*

Find your future at HBE.

"I would recommend HBE to anyone interested in pursuing a construction related field," says John Kelton, Rolla grad and HBE Project Engineer. "Working for HBE presents new and interesting challenges everyday," adds Brett Goodman, Rolla grad and HBE Chief Engineer.

We're a nationwide provider of design and construction for hospitals, medical buildings and financial facilities. HBE is annually ranked among the top design-build firms by Engineering News Record and a great place to build your career.

U.S. Paint Corporation

U.S. Paint specializes in the development, manufacture and support of advanced one component and two component coatings for plastics.

To those who apply our products, the U.S. Paint name is synonymous with "quality and durability." Commitment to service from all levels of our corporation helps us continually exceed our customer's expectations.

Professional Opportunities Include:

- Research and Development Chemists
- Chemical Engineers
- Plant Engineers
- Manufacturing Process Positions
- Quality Control and Quality Assurance
